

Water-quality testing packages.

Ensure the quality of your drinking water and that it's free from bacteria and other contaminants when you add a water-quality test to your inspection services. Below are the most common packages, however, we can test for additional items if desired. Simply reach out by phone or text to [918.853.5113](tel:918.853.5113) or email info@assuredhomeinspectors.com, to discuss your needs and get your free personalized quote. Lender requirements vary, so please verify with your lender as we cannot add additional tests after sampling.

Bacterial
\$225

This is the bare minimum indicator for the safety of drinking water from a bacteriological standpoint only. Get results in approximately two business days.

- Total Coliform Bacteria (Presence / Absence)

Chemical
\$265

This is the bare minimum indicator for the safety of drinking water from a chemical standpoint only. Get results in approximately 10–14 business days.
